
POLICY STATEMENT

The Coonawarra Vignerons Board formed the following policy statement for the nominated spokesperson of the Coonawarra Vignerons to communicate. Please refer to Policies regarding representation of Coonawarra Vignerons.

This Policy Statement is shared with members for a collective understanding.

Genetically Modified Organisms (GMOs)

CV's position on GMOs is consistent with Australian Wine Industry's position that no genetically modified organisms be used in the production of Australian wine. CV will continue to assess the industry position on its merits.

If further information is sought, we recommend contacting Tony Battaglione, Chief Executive – Australian Grape & Wine for further information on the industry position.

NOTES:

Coonawarra Grape and Wine Incorporated (CGWI), trading as Coonawarra Vignerons is an amalgamation of the former Coonawarra Vignerons Association and the Coonawarra Grapegrowers Association. The Coonawarra Vignerons is a not for profit members organisation that supports local grapegrowers and winemakers by facilitating the promotion, marketing, technical innovation, finances and administration associated with the Coonawarra wine region membership. Integral to Coonawarra Vignerons is protecting the integrity, and enhancing the reputation, of Coonawarra as a fine wine region.
